The creative way to explore technology

What is fischertechnik?

fischertechnik is the flexible and innovative construction system, built around the unique fischertechnik building block which allows attachment to all six sides.

fischertechnik – the building blocks to an engaging STEM education program

These days it seems everywhere you turn, leading educators are stressing the importance of STEM Education (Science, Technology, Engineering and Mathematics). The reason for this is simple: Demand for scientists and engineers is expected to grow at a rate far exceeding any other occupational field. At the same time fewer and fewer students are pursuing careers in these areas. When they are, they are often not performing at a sufficient level of academic achievement to be successful. While most schools do address the areas of Science and Maths to varying degrees, the two aspects of the STEM education equation that are most often overlooked are the “T” and the “E”– technology and engineering. To help close this gap, you need materials that allow you to provide an engaging, hands-on introduction to technology and essential STEM related concepts.

You need fischertechnik

fischertechnik's innovative instructional material teaches basic technical understanding and provides optimum preparation for technical occupations.

The fischertechnik learning products are used extensively around the globe, to explore STEM concepts such as:

- **Data Logging**
- **Simple Machines**
- **Mechanics**
- **Statics**
- **Pneumatics**
- **Renewable Energies**
- **Solar Power**
- **Fuel Cell**
- **Optics & Lights**
- **Electronics**
- **Physics**
- **Robotics**
- **Cybernetics**
- **Mechatronics**
- **Automation Control**

fischertechnik is also widely used in industry for vocational training, as well as simulation purposes for realistic representation and simulation of complex systems.

➤ **TEACHING MATERIAL**

www.fischertechnik-elearning.com

How does a gear box work? What is a planetary gear? How is the movement of a windshield wiper produced? How do you design a stable bridge? These questions are answered in the instructional activity booklets in the sets, with illustrations and easy-to-understand information. The didactic information can be used in the classroom, vocational training or at university and can help support lesson preparation.

➤ **“GREEN“ COMPONENTS**

- Gold Cap (3.0V / 10F) – electrolytic capacitor for storing electrical energy
- Solar module (1V / 400mA) – generation of electrical power from solar energy
- Reversible fuel cell with integrated hydrogen storage tank
Operation as electrolyzer (2–3V / 8ml/min / 400–1500mA)
Operation as fuel cell (0.5–0.9V / 300mW / 600mA)

➤ **ACTUATORS**

- Motors – generation of motion and propulsion of fischertechnik models
 - XS Motor (9VDC / 5995rpm / 1.52mNm / 265mA)
 - S Motor (9VDC / 9500rpm / 4.8mNm / 650mA)
 - S Motor (24VDC / 10700rpm / 5mNm / 300mA)
 - XM Motor (9VDC / 338 rpm / 84.15mNm / 950mA)
 - Encoder motor (9VDC / 173.5rpm / 60.29mNm / 465mA)
 - Encoder motor (24VDC / 440rpm / 176.5mNm / 600mA)
 - Solar motor (2VDC)
- Compressor (9VDC / 0.7bar / 2l/min / 200mA) – generation of compressed air
- 3/2-way solenoid valve (12VDC / 0.133A) – control of pneumatic cylinder
- White LED (9VDC / 10mA) and Rainbow LED (9VDC / 10mA)
- LED light barrier 9V (9VDC / 0,02A)
- LED light barrier 24V (24VDC / 0,02A)

COMPATIBLE TO:

- Arduino
- BBC micro: bit
- Raspberry Pi

More information:
www.fischertechnik.de/third-party-compatibility

➤ **SENSORS**

- USB color camera (1MP) – recognition of color, motion, trail, sound and ball
- NTC resistor (1.5kΩ / 450mW) – temperature measurement
- IR trail sensor (2 digital outputs 9V) – trail recognition
- Color sensor (signal: analog 0–9VDC) – color recognition
- Ultrasonic distance sensor (9VDC / distance 3cm-3m) – distance recognition
- Photo resistor (RSW551) – for measuring brightness
- Push button (for use as NC (normally closed) and NO (normally open) switch) – touch sensor
- Phototransistor for light barrier (35V)
- Reed contact – magnetic sensor
- Potentiometer (0-4.7kΩ) – rotating resistor
- Combi sensor – 3 sensors in one device: triaxial 16bit gyroscope, triaxial 12bit accelerometer, geomagnetic sensor, I2C-port (9VDC)
- Environmental sensor (9VDC / 0.12A max. / I2C-port) - for measuring air temperature, humidity, air pressure, air quality

➤ **ELECTRONICS MODULE
ROBOTICS MODULE**

- Electronic control for models with fixed programs
- DIP-switches to select programs
- 3 analog inputs
- 2 motor outputs
- Potentiometer

➤ **BEGINNER LEVEL**

BT Smart Controller

- Processor – 32-bit Cortex M0
- Control unit connecting the model to a PC/tablet
- 2 motor outputs
- 4 digital inputs for sensors
- USB port and Bluetooth 4.0 port

Software ROBO Pro Light

- Simple and easy-to-understand graphic programming (“drag & drop”)

Works with:
SCRATCH

➤ **ADVANCED LEVEL**

TXT Controller

- Dual Processor – 32bit / 600MHz
- 256MB RAM, 128MB flash
- Color 2.4“ touch display
- Integrated loudspeaker
- Micro SD card reader – for expansion of storage capacity
- USB host port – for USB color camera, USB sticks etc.
- Bluetooth / WLAN connectivity
- Connection to Smartphone / Tablet PC
- 8 Universal inputs – digital / analog 0-9VDC, analog 0–5kΩ
- 4 high speed counter inputs – digital, frequency up to 1kHz
- 4 motor outputs – 9V / 250mA (max: 800mA): infinitely controllable speed

Software ROBO Pro

- Simple “drag & drop” programming with graphic flow charts
- Use of various software modules
- Creation of teach-in programs
- Interactive introduction to programming with ROBO Pro

Works with:
SCRATCH

➤ **SIMPLE MACHINES**

500

40
Models

Make everyday technology understandable and ensure lasting comprehension!

The Simple Machines Set offers topics relevant to STEM subject area curricula such as physics, technology, and the natural sciences, and helps students gain a basic knowledge of mechanical and technical principles. 40 different models are used to cover topics like pulleys and hoists, gears, steering, statics, and much more. Simple Machines can be used in supervised and unsupervised learning, and is already a popular and classic choice in many schools.

> **Ideal additions: Motor Set XS, Motor Set XM, Power Set**

Main subjects:
Transmissions / block and tackle / steering / centrifugal governor / cable winch / structural engineering

Item No.	533506	EAN	4048962223361
Models	40	Components	500
Dim. (mm)	440 x 315 x 150	Weight (g)	2832

➤ **MECHANICS 2.0**

500

30
Models

Principles of Mechanical and Structural Engineering

This educational building set is ideal for future mechanical engineers, technicians and engineers: How does a shaft drive or a gearbox work? What is a planetary gear? How do you build a stable bridge? This educational building set containing 30 different models helps you to answer these and other fundamental questions from the world of mechanics and structural engineering. The eLearning portal (fischertechnik-elearning.com) features interesting, educational information and videos about mechanics and structural engineering.

- > **Incl. instructional activity information (free download)**
- > **Incl. XS motor, battery tray for 9V block (battery not included)**
- > **Ideal addition: Accu Set**

Item No.	538423	EAN	4048962263350
Models	30	Components	500
Dim. (mm)	440 x 315 x 150	Weight (g)	2910

Main subjects:
Mechanical / structural engineering / effect of forces on bodies and objects, and much more

➤ PNEUMATICS BEGINNER

200

5
Models

Fundamentals of Pneumatics

This beginner educational construction set can be used to introduce and familiarize students with the topic of pneumatics. True-to-life models are used to visualize how pneumatic valves and cylinders work, helping them understand their function. Air is pumped into an air cell manually. Activating the hand valve sends the compressed air through the hoses and into the pneumatic cylinder. The set offers topics relevant to STEM subject area curricula such as physics, technology, and the natural sciences, and helps students gain a basic knowledge of technical principles. Pneumatics Beginner can be used in supervised and unsupervised learning.

- > Incl. instructional activity information (free download)
- > Incl. 2x pneumatic cylinders, pump cylinder, 2x hand valves, compressed air reservoir

Item No.	540946	EAN	4048962281811
Models	5	Components	200
Dim. (mm)	440 x 315 x 80	Weight (g)	1500

Main subjects:

Generation and distribution of compressed air and control of pneumatic cylinders, and much more

➤ PNEUMATICS

440

8
Models

Fundamentals of Pneumatics

This industry-oriented educational construction set teaches basic principles of pneumatics and uses true-to-life models to illustrate how compressors, pneumatic valves, and pneumatic cylinders work. The powerful, compact compressor guarantees the model has a reliable supply of compressed air. Students can build a total of eight learning models, providing them with extensive knowledge and skills on the topic of pneumatics in combination with the accompanying didactic information.

- > Incl. instructional activity information (free download)
- > Incl. compressor, 4x pneumatic cylinders, 4x 4/3-way manual valves, battery tray for 9V block (battery not included)
- > Ideal addition: Accu Set

Item No.	533013	EAN	4048962220711
Models	8	Components	440
Dim. (mm)	440 x 315 x 150	Weight (g)	2991

▶ OPTICS & LIGHTS

270

15
Models

Principles of Optics and Light

Research optical phenomena and experiment with light! The planetary model provides a visual explanation of the phases of the moon as well as solar and lunar eclipses. Optical lenses with different focal lengths, mirrors, lens tip lamps, and a large number of parts allow students to build a microscope, magnifying glass, telescope, and periscope. The sundial can be used to tell the time. The model uses fiber optics to explain what a total reflection is, and how light can be used to transmit data. This educational construction set gives students an in-depth look at the world of optics and light.

- > Incl. instructional activity booklet
- > Incl. 3x optical lenses (two focal lengths), rainbow LED, mirror, fiber-optic cable, 2x lens tip lamps, battery tray for 9V block (battery not included)
- > Ideal addition: Power Set or Accu Set

Main subjects:
Refraction / reflection of light / light and shadow / fiber-optic cable / optical illusions, and much more

Item No.	533037	EAN	4048962220803
Models	15	Components	270
Dim. (mm)	440 x 315 x 80	Weight (g)	2262

▶ DRIVE SYSTEMS

280

8
Models

Principles of Drive Technology

How does a reaction or a flexible shaft drive work? What's the difference between a friction motor and a rubber motor drive? How can wind be used for propulsion? This educational construction set gives students insight into how different types of drives work. Drive Systems can be used in supervised and unsupervised learning, and is used at many schools.

Main subjects:
Wind propulsion / bending rod drive / recoil drive / rubber band and friction motors

- > Incl. instructional activity booklet
- > Incl. friction motor

Item No.	533028	EAN	4048962220780
Models	8	Components	280
Dim. (mm)	440 x 315 x 80	Weight (g)	1045

► SOLAR BEGINNER

160

4
Models

Principles of Solar Power

Renewable energy is an important source of power today, and will become even more important in the future. This educational construction set is perfectly designed to help students understand the possibilities of solar energy. They can make solar-powered boats and cars run by generating electricity from the sun using a solar module. Solar Beginner can be used in supervised and unsupervised learning, and is one of the most popular sets in many schools.

The didactic activity information about solar is available online (fischertechnik-eLearning.com).

> Incl. instructional activity information (free download)

> Incl. solar module (2V_{DC}; 200mA), solar motor (2V_{DC}), boat hull

Item No.	540947	EAN	4048962281828
Models	4	Components	160
Dim. (mm)	440 x 315 x 80	Weight (g)	1500

Main subjects:

Generation, storage and use of electrical power from water, wind and sun / other energy sources:
Fuel cell

► GREEN ENERGY

390

19
Models

Principles of Regenerative Power

How can ecological electric power be produced? How does a fuel cell work and how does it generate hydrogen? "Renewable energy sources" will become our most important suppliers of energy in the future. Production, storage and use of electricity from natural energy sources such as water, wind and sun are graphically illustrated using various models and numerous experiments. The high performance solar modules open up many attachment possibilities for flexible use in models. The Gold Cap included for power storage releases the stored power slowly. The fuel cell clearly demonstrates how water can be split up into its two constituents: Hydrogen and oxygen. This helps students understand energy forms of the future.

> Incl. instructional activity information (free download)

> Incl. solar motor (2V_{DC}), 3x solar modules (1V; 400mA), Gold Cap power storage device, LED, ON / OFF switch

> Incl. reversible fuel cell with integrated hydrogen storage tank

Item No.	533022	EAN	4048962220773
Models	19	Components	390
Dim. (mm)	440 x 315 x 150	Weight (g)	3278

PHYSICS I 2.0

780

7
Models

Introduction into Physics

The didactic experimental model included in this physics educational construction set is a great way to explain the effects of physical phenomena (acceleration, inertia, equilibrium of forces, the principle of linear motion, the laws of motion). The individual physical effects are illustrated through a variety of experiments to make them easy to understand. Suddenly, physics instruction is fun! Physics I 2.0 can be used in both supervised and unsupervised learning.

- > Incl. instructional activity information (free download)
- > Incl. XS motor, 4x high-speed curves, 17x flex-rails 180, 8x flex-rails 90, 8x balls, 3x 180° curves, 4x 90° curves, cross-over, catch funnel, battery tray for 9V block (battery not included)
- > Ideal additions: Sound+Lights, LED Set, Accu Set or Power Set

Main subjects:

Centrifugal force /
force of gravity /
acceleration /
law of conservation
of energy / pulses

Item No.	538424	EAN	4048962263367
Models	7	Components	780
Dim. (mm)	440 x 315 x 150	Weight (g)	3334

ELECTRONICS

260

16
Models

Principles of Electronics

Simple circuits, series and parallel connections, electronic circuits with transistors, capacitors, resistors and LED's. Step by step, this educational construction set teaches the basic principles of electronics. The electronics module, a control with 16 fixed programs, has 2 motor outputs, 3 analog inputs for sensors and a potentiometer for controlling the speed of the motor.

From a simple flashlight to a swinging boat ride, a flashing blinker and a controllable fan, this construction set uses lots of exciting working models to teach students the basic principles of electronics in a competent, lasting way.

Main subjects:

Electrical circuits, series,
parallel and three-way /
four-way circuits /
electronic components and
circuits, and much more

- > Incl. instructional activity information (free download)
- > Incl. electronics module, XS motor, 2x transistors, 2x capacitors, 3x resistors, 2x push buttons, phototransistor, temperature sensor, lens tip lamp, 2x LED's, battery tray for 9V block (battery not included)

FISCHERTECHNIK CALLIOPE

125

3
Models

Programming in primary school:

fischertechnik Calliope teaches pupils, from Year 3 and older, about the basic principles of programming, in an easy-to-understand format. The set includes fischertechnik pieces, with which three stationary models can be built. With the help of sensors and actuators, pupils can, firstly, follow building instructs to construct easy-to-understand models, such as hand dryers, lights and gates, and then control them using the Calliope board.

The fischertechnik Calliope can be integrated into both guided and free teaching and offers young pupils an easy-to-understand introduction to the world of programming. The accompanying instructional booklet, with teaching and lesson materials, provides step by step instructions for activation and various projects. The lesson materials are free and available to download in the eLearning portal.

- > Incl. instructional activity information (free download)
- > Incl. solar motor, 2x LED light barrier, photo transistor, 2x push button, printed assembly instructions
- > Packaged in a sturdy box 500
-  > Additionally Required: Calliope Board as well as Open Roberta software
- > Power supply: via USB

**Calliope Board

▶ ROBOTICS MINI BOTS

145
5
Models

From Electronics to Robotics

Mini Bots are an ideal way to get started with the fischertechnik Education robotics line. Students can build five agile driving robots using actuators and sensors, like motor, IR trail sensors, and push buttons. The sophisticated model robots can follow lines and avoid obstacles. A parcours template lets students test their models directly. The Mini Bots' programs are permanently saved on the ROBOTICS module, and can simply be selected using the DIP switch. Selecting pre-set programs makes it easy to discover the world of robotics without having to understand programming.

Main subjects:
Electronic parts /
controlling and
regulating / use of
actuators and sensors

- > Incl. instructional activity information (free download)
- > Incl. ROBOTICS module, IR trail sensor, 2x push buttons (limit switch), 2x XS motors, battery tray for 9V block (battery not included)

SCRATCH**

➤ ROBOTICS BT BEGINNER

380
12
Models

Instrumentation and Control (I&C)

An easy way to get started with programming! Robotics BT Beginner explains the basic principles of programming to students based on the ROBO Pro Light graphical programming software, which is used to control stationary and mobile fischertechnik models. Students can use sensors and actuators to build and then control easy-to-understand models like hand dryers, a carousel, barriers, a conveyor belt with die-cutting machine, or mobile tracked vehicles. The »BT Smart Controller«, with 4 inputs for sensors and 2 outputs for motors or lights, has a USB interface and a Bluetooth 4.0 LE interface. The software »ROBO Pro Light« (available for free download) allows even young students to quickly and simply get a handle on easy-to-understand programming. In addition, all models can also be controlled and programmed with a tablet (iOS/Android) using a free app.

Main subjects:

Instrumentation and control / programming / interaction between hardware and software / use of actuators and sensors

- > Incl. instructional activity information (free download)
- > Incl. BT Smart Controller (USB port/ Bluetooth 4.0 LE port), control software ROBO Pro Light (System: Windows 7*, 8, 10/ tablet: Android and iOS), 2x XS motors, 2x LED light barriers, 2x photo transistors, 2x push buttons, battery tray for 9V block (battery not included)

* Selected Bluetooth 4.0 LE sticks are required for Windows 7

ROBOTICS TXT CONTROLLER

The compact ROBOTICS TXT Controller (90x90x25 mm) can be controlled easily with the color 2.4" touch display. The combined Bluetooth / WiFi RF module provides the perfect, wireless interface for numerous applications. The numerous interfaces also include a USB host port for USB sticks and other components such as the fischertechnik USB camera. Integrated Micro SD card slot allows expansion of memory capacity. Controllers can be coupled.

ROBO PRO SOFTWARE

Simple Programming

Graphic flow charts consisting of various software building blocks make it easy for beginners to get started programming. Data can be exchanged between software building blocks and subroutine using variables as well as graphical interfaces, allowing program functions to be demonstrated in an understandable manner. Teach-in features and data exchange with other Windows® software make it easy to create programs.

- > Dual processor ARM Cortex A8 (32bit/600MHz) + Cortex M3
- > Memory capacity: 256MB DDR3 RAM, 128MB Flash
- > 8 Universal inputs: Digital / analog 0-9VDC, analog 0-5kΩ
- > 4 High speed numerical inputs: Digital, frequency up to 1kHz
- > 4 Motor outputs 9V/250mA (max.: 800mA): speed infinitely controllable, short-circuit proof, alternative 8 single outputs for components such as lights, etc.
- > Combined Bluetooth / WiFi RF module: BT 2.1 EDR+ 4.0, WLAN 802.11
- > Infrared receiver diode: for fischertechnik Control Set transmitter
- > USB 2.0 Client: Mini USB port for connection to PC
- > Camera interface: over USB host, Linux camera driver integrated into operating system
- > 10-pin male connector for additional inputs and outputs as well as I2C interface
- > Integrated loudspeaker
- > Integrated real time clock with replaceable buffer battery: for capturing measured values within a defined period of time
- > Linux-based, open source operating system
- > Programming possible with ROBO Pro, C-Compiler, PC-Library etc.
- > Link to smartphones / tablet PC's via Bluetooth or WLAN, allowing use as terminals for controller. Programming using ROBO-Pro software.
- > Power supply: 9VDC socket 3.45 mm or fischertechnik 2.5 mm sockets (for set of rechargeable batteries), Accu Set or Power Set

Instrumentation and Control (I&C)

Professional introduction to the world of robots. Robotics set with over 300 components, high performance ROBOTICS TXT Controller, ROBO Pro graphic programming software for control of mobile and stationary robot models and camera for USB or WiFi image transfer, color recognition, line tracking and detection of motion. The TXT Controller has the following features: Dual processor ARM Cortex A8 (32bit / 600MHz) + Cortex M3, color 2.4" touch display, combined WLAN / Bluetooth module, Micro SD card slot for additional memory space, IR receiver diode, integrated loud speaker, 4 motor outputs, 8 digital / analog inputs for sensors and 4 high speed numerical inputs. Completed program modules are also provided for beginners. Including instructional information material for support of construction and programming. Additional sensors and actuators such as encoder motors, XS motor, push buttons, NTC resistors, phototransistors and LED's allow construction of mobile detection robot, soccer robot, temperature control and many other models! This set is compatible with other Robotics construction sets.

Main subjects:

Instrumentation and control / programming / interaction between hardware and software / use of actuators and sensors

- > Incl. instructional activity information (free download)

▶ ROBOTICS & ELECTRO-PNEUMATICS

440  4 

Instrumentation and Control (I&C)

Ideal introduction to programming realistic electro-pneumatic machines and robots. The subjects of electro-pneumatics and vacuum technology are demonstrated clearly with the aid of fascinating models such as the pinball machine, compressed air motor, color sorting robot for colored parts and ball obstacle course robot. The powerful and compact compressor guarantees a reliable supply of compressed air for the models. The electro-magnetic valves included allow remote control of the models with a PC.

- > Incl. instructional activity information (free download)
- > Incl. compressor, mini motor, 2x solenoid valves, optical color sensor, vacuum suction device, 3x cylinders with spring, 2x phototransistors, 2x lens tip lamps, 11x flex-rails 180
-  > Required: ROBOTICS TXT Controller, ROBO Pro software and 9V / 1A power pack (Accu Set or Power Set)

▶ ROBOTICS SENSOR STATION IoT

150

6
Models

A professional introduction to data logging! The stationary sensor station with a moving camera, new environmental sensor and other sensors, enables the measurement of air temperature, humidity, air pressure, air quality, volume and brightness. The models can be programmed and controlled with the graphical programming software ROBO Pro and the ROBOTICS TXT controller, and are ideal for teaching topics such as (data logging, programming and the use of actuators and sensors). The sensors' data can be collected and plotted on a graph. In addition, the model can connect to a WiFi network, so that the camera can also be controlled from a distance. The TXT controller can also be connected to a cloud server, where the sensors' data is saved and can be retrieved. So using a user interface, a so-called "dashboard", the various sensor data can be permanently monitored, and the movement of the camera can be controlled. Further models and applications the pupil can first design and then control are: Barometer (measures air pressure), Damp monitor (measures humidity and air temperature), environmental wellness sensor (measures the air quality, temperature, humidity) with LED display, noise sensor (measures volume) and frost monitor (tests temperature against the freezing point). When the pre-set limit values are exceeded, the system alerts the user via an LED display or with an alarm tone. There are many more possible applications. The innovative teaching material from fischertechnik supports you in practically conveying technical understanding and giving them a real insight. The accompanying instructional booklet, with teaching and lesson materials, offers background information, projects, and programmer tips.

- > Incl. instructional activity information (free download)
- > Incl. environmental sensor, brightness sensor, USB camera (1 MP), 2x encoder motor, 2x push button, LEDs
- > **Additionally Required: ROBOTICS TXT Controller, ROBO Pro software, Accu Set or Power Set**

The product Robotics Sensor Station IoT is also available as a complete set. Also included in this complete set (Item No.: 544937) are the ROBOTICS TXT Controller, the ROBO Pro software and a power supply unit (9V, 2.5A).

Focus on robotics competitions

The fischertechnik Robotics Competition Set has been developed for schools, universities and other education establishments seeking to enhance or improve their previous robotics competitions for their students. It contains robot models such as the trail searcher, detection robot, soccer robot, hindrance detector with camera and much more. The models are suitable for the RoboCup competition (junior category) and various other competitions all over the world. The fischertechnik Robotics Competition Set helps students with project-based learning for discovering robotics and the key STEM teaching principles. The set consists of 670 parts. These include static parts, gear-wheels, transmissions, wheels, DC motors, motors with integrated encoders, USB camera, combi sensor (gyro, accelerometer, compass) and other fischertechnik sensors. Incl. ROBO Pro software with possibilities for programming on five levels. From the beginner's level through to professional programming with objects, sub-programs, variables and user-defined commands. Furthermore, obstacle course templates are included for testing the models.

- > Incl. printed assembly instructions and instructional activity information on CD
- > Incl. ROBOTICS TXT Controller, CD with controller software ROBO Pro, USB camera, 2x encoder motors, XS motor, lens tip lamp, 3x LED's, combi sensor (gyro, accelerometer, compass), 3x ultrasonic distance sensors, IR trail sensor, optical color sensor, photo resistor, phototransistor, NTC resistor, magnetic sensor (reed contact), Accu Set (battery charger with rechargeable NiMH battery)

Main subjects:
Robotics competitions

Item No.	519143	EAN	4048962159356
Models	20	Components	670
Dim. (mm)	440 x 315 x 150	Weight (g)	3760

► STEM ENGINEERING

STEM Tutorial

22 Models

Project-based learning with a focus on standards

“The fischertechnik STEM program combines maths, reading and writing standards in the compulsory subjects with the National Science Education Standards and the Standards of ISTE and ITEEA. The STEM Engineering Set easily fills several months of the school year and introduces the students to applied engineering through a systematic approach to robotics, mechatronics and automation control.”

Tom White, Program Creator

Project Themes:

Mechatronics / cybernetics / design and documentation / structures / mechanical systems / control systems / sensor systems / motors and other actuators / automation / principles of robotics / mobile robots

Main subjects:

Robotics / cybernetics / mechatronics / automation control

- > Incl. assembly instructions for 22 model examples from 3 STEM Robotics Kits and comprehensive STEM tutorials for teachers and students on CD
- > Incl. ROBOTICS TXT Controller, CD with controller software ROBO Pro, USB camera, 2x encoder motors, 2x XS motors, mini motor, compressor, 2x LEDs, 2x solenoid valves, vacuum suction device, optical color sensor, 2x phototransistors, NTC resistor, 6x push buttons (limit switch), Accu Set (battery charger with rechargeable NiMH battery)

Item No.	519341	EAN	4048962160871
Models	22	Components	890
Dim. (mm)	440 x 315 x 150	Weight (g)	5450

› 3D PRINTER

Powered by: **German RepRap** 

890

Build, Plug & Print! This build-it-yourself kit gives users a fascinating insight into the groundbreaking technology of 3D printing. Print your own parts yourself at any time - so individual, so easy, so flexible - for use! Use either the supplied printing examples, different examples on our eLearning portal (fischertechnik-elearning.com) or your very own print data. The robust 3D Printer is easy to build and can be used for 3D printing of different parts. Users acquire basic knowledge about 3D printing and an insight into this revolutionary technology that promises a high degree of future potential. Includes PC software for controlling the printer via the USB interface. The eLearning portal offers exciting, instructional activity information and videos.

- > Incl. 3D Controller with Atmel microcontroller, USB interface for PC (Micro B USB port, incl. interface cable), 4 step motor drivers (for x-, y- and z-axes and extruder), one power output (MOS-FET) for the extruder nozzle (hot end), connections for 3 limit switches and a temperature sensor, DC port for voltage supply 19V, 6.3A. Dimension: 150x90x25 mm
- > Incl. 3D Print Control software, with slicer and printer control, specially adapted to fischertechnik 3D Printers (Windows 7, 8, 10). Numerous finished printing examples included as G-codes and STL files. Also works with Mac OS X and Linux with the software RepetierHost: www.fischertechnik.de/3DPrinter-FAQ
- > Incl. 4 high-torque step motors (x-, y- and z-axes, extruder), 3 mini push buttons (as limit switches for x-, y- and z-axes), heated nozzle (for 1.75 mm diameter filament) with temperature monitoring, printing bed with removable printing plate
- > Incl. power unit (AC input 100-240V, DC output 19V, 6.3A, 50-60Hz)
- > Incl. high quality filament (50 g roll, PLA, 1.75 mm diameter, green). Premium filament in special fischertechnik colors (50 g roll or 500 g coil) can be ordered separately
- > Incl. instructional activity information (free download)

Main subjects:
Basic knowledge of 3D printing / interaction between hardware and software / robotics / control

Technical data:

- Printing range: 115x100x65 mm
- Layer thickness: min. 0.2 mm
- Filament diameter: 1.75 mm
- Nozzle diameter: 0.5 mm
- Material: PLA (polylactide)

Item No.	536624	EAN	4048962250312
Models	1	Components	890
Dim. (mm)	465 x 160 x 390	Weight (g)	6320

➤ **FACTORY SIMULATION**

More information: www.fischertechnik.de/en/simulating
and in the separate catalogue „Training Models“

Combination of the models Sorting Line With Color Detection, Multi Processing Station With Oven, Automated High-Bay Warehouse and Vacuum Gripper Robot. Self-contained material cycle: workpieces are retrieved from the Automated High-Bay Warehouse, processed in the Multi Processing Station With Oven, then sorted by color in the Sorting Line With Color Detection and finally stored in the Automated High-Bay Warehouse again.

The Factory Simulation is available in both 9V and 24V version:

Item No.: 536629 (9V... / with 5x ROBOTICS TXT Controllers and controller software ROBO Pro)

Item No.: 536634 (24V... / without controllers)

Item No.	536629 (9V...)	EAN	4048962250367
Item No.	536634 (24V...)	EAN	4048962250411
Dim. (mm)	972 x 772 x 402	Weight (kg)	20.6 (9V...), 19.5 (24V...)

 > **Required for 536629 (9V): 3x Power Supply**
Item No. 505287 (9V/220V) / 122952 (9V/120V)

➤ **VACUUM GRIPPER ROBOT**

➤ **Automated HIGH-BAY WAREHOUSE**

➤ **SortiNG LiNE With CoLoR DeTeCtiON**

➤ **MULTI PRoCessiNG StAtiON With OvEN**

720

➤ **CREATIVE BOX 1000**

Supplement for all fischertechnik sets!
More than 700 components from the current fischertechnik assortment (no electronic parts). Packed in BOX 1000 with building board, 390 x 270 mm as cover.

Item No.	91082	EAN	4006209910825
Components	720	Weight (g)	2698
Dim. (mm)	390 x 95 x 270		

➤ **BOX 1000**

Perfect for storing fischertechnik parts
Practical storage box with eight sorting trays and 32 sorting partitions. The cover also serves as a large building board, 390 x 270 mm.

Item No.	30383	EAN	4006209303832
Components	–	Weight (g)	1889
Dim. (mm)	390 x 95 x 270		

➤ **ACCU SET**

Charger with micro-controller for reliable protection against overcharging. Extremely short charging times, max. 2hrs., heavy duty battery pack with short-circuit protection, 8.4V / 1500mAh.

Item No. 220V	34969	EAN	4006209349694
Item No. 120V	57487	EAN	4006209574874
Item No. 240V UK	79833	EAN	4006209798331
Item No. 240V AUS	52091	EAN	4006209520918
Components	–	Weight (g)	490
Dim. (mm)	225 x 65 x 150		

➤ **POWER SET**

Power supply and infinite speed controller all in one. The plug-in power pack for all fischertechnik models. Power supply performance data: Voltage 9V_{DC}, 2.5A. Power controller performance data: Controllable output 1A max., additional output with 9V_{DC}, 1A max. (not controllable), both outputs short-circuit-proof with overload protection.

Item No. 220V	505283	EAN	4048962069440
Item No. 120V	91087	EAN	4006209910870
Components	–	Weight (g)	431
Dim. (mm)	225 x 65 x 150		

45

➤ **MOTOR SET XS**

Thanks to the compact measurements, this motor can be installed almost anywhere. In addition to the building blocks, gearbox parts and toothed gears, the set also contains a safety battery tray with integrated pole-reversing switch for 9V block batteries (battery not included).
> Performance data: Voltage 9V, max. output 1.0W at 6000RPM

Item No.	505281	EAN	4048962069426
Components	45	Weight (g)	201
Dim. (mm)	225 x 65 x 150		

40

➤ **MOTOR SET XM**

High performance geared motor in compact plastic casing with numerous possibilities for attachments. With many toothed gears, axles and gearbox parts.
> Performance data: Voltage 9V, max. output 3.0W about 340RPM
> **Required: Accu Set or Power Set**

Item No.	505282	EAN	4048962069433
Components	40	Weight (g)	278
Dim. (mm)	225 x 65 x 150		

➤ **BT CONTROL SET**

The Bluetooth Control Set makes it possible to control fischertechnik models remotely using the included remote control or a smartphone or tablet. Bluetooth low energy technology offers a long range of up to 10 meters. Control up to three motors and one servo motor. Steering angle and speed control are infinitely variable. Remote control can be operated with up to two receivers, allowing for numerous applications. > **Required: Accu Set and 9V block (battery not included)**

Item No.	540585	EAN	4048962280043
Components	–	Weight (g)	400
Dim. (mm)	225 x 65 x 150

➤ **TRAINING & SIMULATION**

fischertechnik is widely used in industry for vocational training, as well as simulation purposes for realistic representation and simulation of complex systems. The function models are a proven and inexpensive means to plan and to develop industrial applications. They are employed worldwide in the areas of training, development and presentation. The flexibility and the modularity of the fischertechnik system in connection with the industrially adapted sensors and actuators as well as PLC's from leading manufacturers open up almost unlimited possibilities for hardware simulation. Complicated technical systems are presented realistically and thus perfectly simulated so that they are understandable for everyone. This makes investment decisions easier and reduces the costs for the correction of planning mistakes.

➤ **INDUSTRY 4.0
INTERNET OF THINGS**

fischertechnik factory simulations are already prepared for Industry 4.0 today. Core topics in digitally networked production can be visualized physically and demonstrated in an easy to understand way, enriched with sensors and combined with a cloud. These include preventative maintenance, production quality predictions, human-machine interactions, remote control, data exchange via dashboard. The SAP UCC has developed a teaching scenario with case studies that helps both teachers and students alike to understand the opportunities offered by Industry 4.0.
