Lieber fischertechnik-Freund!

Die fischertechnik-Baukästen Statik 100 S, 200 S, 300 S und 400 S sind eine geglückte Ergänzung zu unseren Grundkästen. Mit ihnen wird das Spielen, Konstruieren und Experimentieren noch interessanter, spannender und aufschlußreicher. Grundkästen und Statikkästen lassen sich beliebig miteinander kombinieren.

Die Elemente der Statikbaukästen begeistern vor allem beim Bau von Brücken, weit ausladenden Kränen, Verladeeinrichtungen und modernen Maschinen. Die abgebildeten Modelle zeigen nur eine Auswahl. Die weite Welt der Technik stellt teils neue Aufgaben, deren selbständige Lösung mit „fischertechnik - System ohne Grenzen“ große Freude bereitet.

Dear fischertechnik friends,

The fischertechnik statics kits, 100 S, 200 S, 300 S and 400 S, form an ingenious extension to the construction range. Models and experiments become more interesting, more exciting, and more instructive with the addition of these new parts. The basic sets and the static kits can be used together in any combination.

The statics parts inspire everyone to build bridges, wide-sweep cranes, loading equipment and modern machinery. The models illustrated are only a selection of the possibilities. The changing world of engineering constantly presents new problems, but great fun can be had in discovering solutions with the aid of fischertechnik – the system with practically no limits.

Cher ami fischertechnik,

Le système fischertechnik s'élargit de façon ingénieuse avec les nouvelles boîtes «superstructures» 100 S, 200 S, 300 S et 400 S. Les boîtes de base, enrichies de ces nouveaux éléments, rendent le jeu encore plus amusant et les expérimentations encore plus intéressantes.

Les nouvelles boîtes «superstructures» peuvent être combinées avec la boîte de base, sans aucune restriction.

Il est passionnant de réaliser des ponts d'une vaste portée, des installations de transbordement, des grues géantes et de pouvoir recréer avec le système de construction illimité fischertechnik ce vaste monde technique qui nous entoure.

Caro amico del fischertechnik!

Le scatole fischertechnik Statik 100 S, 200 S, 300 S e 400 S, sono una ottima integrazione delle nostre scatole base.

Con esse, giocare, costruire e sperimentare, diventa ancor più interessante, affascinante e ricco di risultati.

Le scatole base e le scatole Statik, possono completarsi magnificamente.

Gli elementi Statik sono particolarmente indicati per la costruzione di Ponteggi, Grù, impianti di caricamento e moderni macchinari.

Gli allegati modelli ne illustrano solo una serie.

Il mondo della tecnica pone problemi sempre nuovi la cui risoluzione con il sistema senza limiti „fischertechnik“ procura delle grosse soddisfazioni.

Beste fischertechnik-vriend,

De fischertechnikbouwdozen Statika 100 S, 200 S, 300 S en 400 S zijn een prachtige aanvulling op onze basisdozen. Hierdoor wordt het spelen, konstrueren en experimenteren nog interessanter, spannender en met nog meer mogelijkheden. Basisdozen en Statikadozen kunnen naar wens gekombineerd worden.

De elementen van de Statikabouwdozen zijn uitermate geschikt voor de bouw van bruggen, ver overhangende kranen, laad-inrichtingen, en moderne machines.

De afgebeelde modellen geven slechts een keus.

Het oplossen van de steeds nieuwe opgaven van de grote wereld van de techniek geeft het plezier om met „fischertechnik systeem zonder grenzen“ te werken.

Die Verbindungsplatten aus 010 und 011 klipst man einfach auf die Bausteine. 012 enthält Fenster und Türen; 013 Kamin, Giebel und Firste. Die Klammern (015) verbinden Verkleidungsplatten untereinander. In 014 findest Du 12 praktische große Flachsteine.

The panels in kits 010 and 011 clip on with ease to the building blocks. 012 contains windows and doors; 013 chimney, gables and roof-ridges. The clamps (015) connect the panels to each other. In 014 there are 12 useful long panels.

Les pierres plates des boîtes 010 et 011 sont tout simplement clipsées sur les pierres de base grises. Les boîtes 012 contiennent des portes et fenêtres, les 013 une cheminée, faîtière et frontons. Les raccords (015) tiennent les éléments d'habillage. Dans les boîtes 014 se trouvent 12 pierres plates.

Le piastre di collegamento 010 e 011 si collegano a pressione agli elementi base.

La scatoletta 012 contiene porte e finestre; la 013 il camino, il colmo del tetto e il timpano.

I fermi (015) collegano tra di loro le piastre di rivestimento. Nella scatoletta 014 puoi trovare 12 pratici grandi elementi piani.

De verbindingsplaten uit 010 en 011 druk je eenvoudig op de bouwstenen. 012 bevat vensters en deuren, 013 schoorsteen, gevel en nok. De klemplaten van 015 verbinden de bekledingsplaten aan elkaar. In 014 vindt je 12 praktische grote platte stenen.

Die fischertechnik-Baukästen Elektro-Mechanik e-m 1 und e-m 2 sind ein Teil unseres Ausbauprogrammes. Elektrische Schaltungen, elektromechanische Steuerungen und interessante Experimente lassen sich damit in großer Zahl durchführen.

The fischertechnik kits Electromechanics e-m 1 and e-m 2 form part of our construction box program. Electric circuits, electro-mechanical controls, and interesting experiments can be carried out.

Les boîtes fischertechnik «électromécaniques» e-m 1 et e-m 2 font partie de la série expérimentale. Elles permettent de réaliser de nombreuses expériences captivantes et instructives, comme par exemple des commandes et connexions électriques et électromécaniques.

Le cassette di elettromeccanica fischertechnik e-m 1 ed e-m 2 fanno parte del nostro programma. Mediante accoppiamenti elettrici e comandi elettromeccanici si riesce ad eseguire un gran numero di esperimenti avvincenti ed interessanti.

fischertechnik bouwdozen elektromechaniek e-m 1 en e-m 2 maken deel uit van ons bouwprogramma. Een groot aantal elektrische schakelingen, elektro-mechanische besturing, en interessante experimenten kunnen hiermede worden uitgevoerd.

In unserem Modell „Verkehrsampel“ sind 2 fischertechnik-Schleifringe mit Unterbrechern zu einem Programmgeber geschaltet, der den wirklichkeitsgetreuen Wechsel zwischen Rot, Gelb und Grün steuert.

In our model »Traffic-Light«, two fischertechnik slip rings with circuit breakers are connected to provide a program transmitter which controls the change between red, yellow and green as in actual systems.

Dans le modèle «Feu tricolore», les deux bagues de contact fischertechnik munies d'interrupteurs, forment un dispositif programmé, réglant l'alternance des feux rouge, jaune et vert.

Nel nostro modello »Semaforo« due anelli collettori fischertechnik muniti di interruttore sono collegati a formare tutto un programma che permette il cambio del rosso, giallo e verde come in realtà.

In ons model: „verkeerslichten“ zijn 2 fischertechnik sleefringen met onderbrekers tot een programma-automaat geschakeld, die het afwisselen tussen rood, oranje en groen besturen, net als dat in werkelijkheid gebeurt.

Unsere Licht-Elektronik-Kästen fischertechnik I-e 1 und I-e 2 führen in die Grundlagen der Elektronik ein. Zahlreiche interessante Modelle veranschaulichen die Aufgaben der Technik von heute und morgen: Überwachen – Sichern – Zählen – Messen – Steuern – Regeln.

Our Light-Electronics kits fischertechnik I-e 1 and I-e 2 are an introduction to the fundamentals of electronics. Numerous models demonstrate the tasks and objectives of today's and tomorrow's engineering: monitoring – guarding – counting – measuring – controlling – regulating.

Les boîtes fischertechnik «photoélectriques» I-e 1 et I-e 2 sont une introduction de base dans l'électronique. De nombreux et intéressants modèles illustrent le rôle de la technique d'aujourd'hui et de demain: contrôler – protéger – compter – mesurer – commander – régler.

Le nostre cassette di elettronica fischertechnik I-e 1 ed I-e 2 indirizzano verso il fondamento della elettronica.

I diversi compiti che la tecnica di oggi ed anche del domani ha da svolgere, sono resi evidenti dai numerosi modelli. Compiti come: controllare – assicurare – contare – misurare – manovrare – regolare.

Onze fotoelektronische bouwdozen fischertechnik I-e 1 en I-e 2 vormen een inleiding voor de basis van de elektrotechniek. Talrijke interessante modellen maken de problemen van de techniek van heden en van de toekomst aanschouwelijk: beveiligen – tellen – meten – besturen – regelen.

Schalt-Prinzip des Schaltstabes

Trafo (mot. 4)

Unser Foto zeigt einen „Schrägaufzug“ mit kontaktloser Umsteuerung des Wagens am oberen und unteren Ende seines Fahrweges.

Our photograph shows an Inclined Elevator with contactless reversal of truck at upper and lower end of a path.

Notre photo montre un ascenseur sur plan incliné avec inversion de mouvements sans contact du wagonnet en fin de cours.

La nostra foto mostra un elevatore inclinato con inversione senza contatto del carro all' inizio e alla fine di ogni carreggiata.

Onze foto toont een „schuine lift“ met contactloze omkeerbeweging van de wagen aan het boven- en benedeneinde van de afgelegde weg.

Grundkästen ● Basic kits ● Boîtes de base ● Cassette base ● Basisdozen

Die Grundkästen stellen ein in sich abgeschlossenes Programm dar. Jeder einzelne Grundkasten ist ein kompletter Baukasten. Die Grundkästen können durch Ausbau- und Zusatzkästen erweitert werden.

The basic sets form a balanced programme. Each of the basic kits is complete in itself. Each can be extended by adding extension and supplementary kits.

Les boîtes de base constituent en elles seules un ensemble. Chaque boîte de base est une boîte de construction complète. Elle peut être élargie avec des boîtes accessoires et complémentaires.

Le cassette base consentono già di svolgere un programma costruttivo completo, che può comunque venire ampliato a piacere tramite le scatole addizionali e di perfezionamento.

De basisdozen zijn een op zichzelf staand systeem. Iedere basisdoos is een complete bouwdoos. En kan door aanvullings- en uitbreidingsdozen naar wens uitgebouwd worden.

Ausbaukästen ● Extension kits ● Boîtes accessoires ● Cassette di perfezionamento ● Uitbreidingsdozen

Für die Ausbaukästen Statik. Motor und Getriebe, Elektromechanik und Lichtelektronik ist auf jeden Fall ein Grundkasten erforderlich.

Statik: Jeder Statikbaukasten fischertechnik S kann mit jedem Grundkasten kombiniert werden.

In each case a basic set is necessary before adding dynamics, motor kits, electro-mechanics or photo-electric kits. Statics: Each statics construction set, fischer-

technik S, can be combined with any of the basic sets.

Avec une boîte accessoire statique (superstructures), moteur, engrenages, électro-mécanique ou photo-électrique il est indispensable d'avoir une boîte de base. Statique (superstructures): Toutes les boîtes «statiques» fischertechnik S peuvent être combinées avec chaque boîte de base.

Per le cassette di perfezionamento Statica, «motore e trasmissione», Ellettromeccanica ed Elettronica, è senz'altro necessaria una cassetta base. Statica: ogni cassetta costruttiva Statica fischertechnik S, può essere collegata con quelle «Base».

Voor de uitbreidingsdozen statika, motor en reductiedrijfwerk, elektromechanika en lichtelektronika moet men in elk geval de beschikking hebben over een basisdoos. Statika: Iedere statika-bouwoos kan met elke basisdoos gekombineerd worden.

Motor und Getriebe: Motor- und Getriebe-kästen können als Antrieb für alle Modelle der Grund- und Ausbaukästen verwendet werden.

Motor kits: The motor kits provide the means of powering all the models built with the basic and experimental sets.

Moteur et engrenages: Les boîtes moteur et engrenages peuvent être utilisées pour l'animation de tous les modèles de boîtes de base et des boîtes accessoires.

Motore e trasmissione: Le scatole con motore e trasmissione possono essere adoperate per consentire il movimento di tutti i modelli realizzati con le cassette »Base« e di »Perfezionamento«.

Motor en reductiedrijfwerk: Motor en reductiedrijfwerk kunnen als aandrijving voor alle modellen van de basis- en uitbreidingsdozen gebruikt worden.

fischertechnik mini-mot. 1 Art.-Nr. 32091

Motor und Getriebe in Bausteingröße · Miniature motor and miniature gearbox · Boîte moteur · Motore dello stesso formato degli elementi base con mini-cambio · Motor met reductiedrijfwerk in de grootte van een bouwsteen

fischertechnik mot. 1 Art.-Nr. 30091

Motorkasten · Motor kit · Boîte moteur · Scatola con motore · Motordooos

fischertechnik mot. 2 Art. Nr. 30092

Getriebekasten · Gearbox kit · Boîte engrenages · Scatola con cambio · Reductiedrijfwerk

Elektromechanik: Für elektromechanische Modelle und Versuche sind der Grundkasten fischertechnik 200 und fischertechnik mot. 1 Voraussetzung. Kombinationsmöglichkeiten mit allen übrigen Grund- und Ausbaukästen.

Electromechanics: For electromechanical models and experiments it is necessary to use at least the basic set fischertechnik 200 and motor kit mot. 1. All the other experimental kits can be used in conjunction with these.

Electro-mécanique: Pour les expériences et la réalisation de modèles électro-mécaniques, il est nécessaire de posséder la boîte de base fischertechnik 200 et fischertechnik mot. 1. Toutes les combinaisons sont possible avec les autres boîtes accessoires.

Elettromeccanica: Sono i naturali ampliamenti delle scatole base fischertechnik 200 e mot. 1 per modelli elettromeccanici e per esperimenti. Possibilità di combinazione con tutte le altre cassette di perfezionamento.

Elektromechanika: Voor elektromechanische modellen en experimenten zijn noodzakelijk: de basisdoos fischertechnik 200 en fischertechnik mot. 1. Gekombineerd kan worden met alle andere uitbreidingsdozen.

fischertechnik e-m 1 Art.-Nr. 30071

Elektromechanik-Kasten · Electromechanics kit · Boîte électro-mécanique · Casseta elettromeccanica · Elektromechanikadoos

fischertechnik e-m 2 Art.-Nr. 30072

Elektromechanik-Kasten · Electromechanics kit · Boîte électro-mécanique · Casseta elettromeccanica · Elektromechanikadoos

Lichtelektronik: Für lichtelektronische Modelle und Versuche sind der Grundkasten fischertechnik 200, fischertechnik mot. 1 und Trafo mot. 4 Voraussetzung: Kombinationsmöglichkeiten mit allen übrigen Grund- und Ausbaukästen.

Photo-electrics: For photo-electrics models and experiments it is necessary to use at least the basic set fischertechnik 200, motor kit mot. 1 and transformer mot. 4. All the other experimental kits can be used in conjunction with these.

Photo-électrique: Pour les expériences et la réalisation de modèles photo-électriques, il est nécessaire de posséder la boîte de base fischertechnik 200, fischertechnik mot. 1 et le transformateur mot. 4. Toutes les combinaisons sont possible avec les autres boîtes accessoires.

Elettronica: Sono l'ampliamento delle cassette base fischertechnik 200 e fischertechnik mot. 1 e mot. 4, per modelli ed esperimenti elettronici. Possibilità di combinazione con tutte le altre cassette di perfezionamento.

Lichtelektronika: Voor lichtelektronische modellen en experimenten zijn noodzakelijk: de basisdoos fischertechnik 200, fischertechnik mot. 1 en trafo mot. 4. Kombinatiemogelijkheden met alle andere uitbreidingsdozen.

fischertechnik von den Fischer-Werken, aus denen auch die weltbekanntesten grauen Nylon-Dübel kommen.

fischertechnik comes from the Fischer Factories in Western Germany which also make the world-famous Nylon Fixing Devices.

fischertechnik fabriqué par les usines Fischer mondialement connues par sa gamme de chevilles grises en Nylon.

fischertechnik dagli stabilimenti Fischer-Werke dai quali provengono anche i tasselli di Nylon grigi rinomati in tutto il mondo.

fischertechnik van de Fischer Fabrieken, waar ook de wereldbekende grijze Nylon-pluggen vandaan komen.
